Dear Intissar,

Thank you for your message and for sharing the information.

Noted regarding the web services documentation and the Moyasar integration details.

Regarding the meeting, we are available at the following times:

- Tuesday at 15:00 (Tunis time)
- Wednesday at 16:00 (Tunis time)

Please confirm which slot suits you best.

Looking forward to your confirmation.

Best regards,
Ayman

Dear Ayman,

I hope you are doing well.

Thank you for your message.

Web Services:

We will share the full documentation with you as soon as it is ready.

Payment Gateway Integration (Moyasar):For full technical documentation, please refer to the Moyasar documentation: <https://docs.moyasar.com/>**Staging (Test) API Keys:**

- Publish Key: pk_test_LQrSYL1vCXyLzQMKcwBQywReWKnP82t4dgXXfy85

Production (Live) API Keys:

- Publish Key: pk_live_UybDY4YMDbEPYXhooRuEfVeciYM5GKyWGCLj75LQ
- Secret Key: sk_live_JhjFTvwJ6XYCxm8r3FgGj1tVsSczk9jZPiorNWH

Apple Pay:

You will need a Merchant ID, which you can find in the attached file.

Additionally, we would like to schedule a meeting to review the current Bunyan business donations and ensure we are aligned on the right path. Please let us know your availability so we can schedule a

convenient time.

Please let me know if you need any additional information.

Best regards,

Dear Intissar,

I hope you are doing well.

As part of the ongoing development of the **BUNIYAN Web Portal**, we are currently progressing with the integration phase with your Odoo ERP system. To proceed efficiently, we kindly request your support in providing the necessary staging environment details and related documentation.

◆ **Required API Endpoints (Staging Environment)**

Could you please share the staging URLs along with access credentials (if applicable) for the following web services:

- **Project Listing API** (List Projects)
- **Payment Listing API** (List Payments)
- **Payment Creation API** (Post Payment)

Additionally, we would appreciate it if you could provide:

- API documentation (request/response structure, authentication method, etc.)
- Sample payloads for testing purposes

◆ **Payment Gateway Integration (Almoyasser)**

For the payment integration, kindly provide:

- Full technical documentation for **Almoyasser payment gateway**
- **Staging (Test) API keys**
- **Production (Live) API keys**
- Any specific configuration requirements or integration guidelines

This information will allow us to proceed with development and testing without delays and ensure proper alignment between both systems.

Please let us know if a technical meeting is required to clarify any integration points—we would be happy to arrange one.

Thank you in advance for your cooperation and support.

Best regards,
Ayman Chakroun

Hello,

Please find attached three documents regarding the Bunyan API integration:

1. **Bunyan_Apis_Documentation.pdf**: This document provides a summary and technical details for the following endpoints:

- **Projects**: /v1/projects
- **Korba**: /v1/korba
- **Payments**: /v1/Payments
- **Health States**: /v1/health/states
- **Family States**: /v1/family/states
- **Membership**: /v1/membership/types and /v1/membership/request
- **Payment & Transaction Process**: /v1/donation/checkout/savepayment

2. **Service documentation**

service_all_documentation_bunyan.pdf: This file contains the workflow and endpoint details for the Unified Service API (/v1/services/register). It covers the multi-step registration process for the following services : Renovation, Construction, Loan, and Ownership.

service_documentation_bunyan.ods: An Excel/Spreadsheet companion that provides data tables and payload examples for the different service types mentioned above.

Best regards

Dear Team,

Please find the updated documentation for the various endpoints integrated into the Odoo ERP (Staging environment) attached. I have also included a Postman JSON collection with request examples to help streamline your testing process.

Key Updates from our last meeting:

- **API Authentication:** We are currently implementing a requirement for a valid API key for all requests. I will share this key with you as soon as the configuration is complete.
- **Save Payments Endpoint:** We are modifying this endpoint to support bulk processing (creating multiple payments in a single request). We expect to finalize these changes shortly and will provide updated documentation immediately thereafter.

Requirements from your side: To proceed with the integration, please provide the **Moyasar Staging API Secret Key**. This is required to retrieve transaction details during testing.

Staging URL: <http://bunyan.open.sa/>

Please let me know if you have any questions or require further clarification during your testing.

Dear Team,

We have a question regarding the donation process. Currently, after every transaction, the system sends a mobile message to the donor to thank them.

However, transactions are now being saved in the system only at the end of the day. We want your guidance on the best approach:

- Should the message be sent directly from the website (handled by the website team) after each transaction?
- Or should we prepare an endpoint to be consumed by the website for this purpose?

Thank you for your support.

Best regards,

Dear Team,

Yes, the message will be sent directly from the website after each transaction.

This approach ensures that donors receive immediate confirmation and acknowledgment without waiting for end-of-day processing, improving user experience and engagement.

Please let us know if you need any additional support or clarification.

Best regards,

Dear Team,

Following up on our previous correspondence regarding the Odoo ERP integration, I would like to provide the latest technical details and resources for testing.

1. API Authentication

We have implemented the API key requirement for the mentioned endpoints. Please use the following header for authentication:

- **Key:** api_key
- **Value:** callback_api_key

Note: This value is currently set for the staging environment and can be updated later if required.

2. Documentation & Payloads

03/09/2026 14:53

Messagerie Hadooc TN - Re: Request for Staging APIs & Payment Gateway Details - BUNIYAN Web Portal Integrati...

For detailed information regarding the request/response structures and sample payloads for testing purposes, please refer to the shared Drive folder below:

[Link to Google Drive Folder](#)

This folder includes the updated documentation and schemas .

Please let us know if you encounter any issues during your integration tests.

Best regards
